# **Substrate**

Metals (cleaned and sanded). In the event of high requirements in terms of mechanical stress and corrosion protection and, in particular, critical surfaces such as aluminum or zinc, surfaces should be pretreated with a suitable primer. Aluminum (cleaned and sanded). In the event of high requirements in terms of mechanical stress and corrosion protection and, in particular, critical surfaces such as aluminum or zinc, surfaces should be pretreated with a suitable primer. Various Plastics (cleaned and sanded) Check compatibility and adhesion first on an unobtrusive area. If necessary prime with a suitable

Plastic Adhesion Promotor. Not suitable for Substrates of Polyvinyl Chloride (PVC), Polystyrene (PS), Polyethylene (PE), Poly-Propylene (PP) and Blends thereof (E.g. PP/EPDM) Wood (cleaned and sanded) Glass, Ceramics (cleaned)

The damaged area must be dry and free of grease and dust and all rust needs to be removed.

# **Processing**

**Protection measures** 

Shake

Wear personal protection equipment. (respiratory mask/gloves/goggles) For more information, see safety data sheet.

Shake can thoroughly for at least 2 minutes from when the mixing balls are heard.

processing conditions. The level of dryness is determined pursuant to DIN 53150.

IR drying possible, Respect technical manual

## Continue

Finish

Can be polished with conventional polishes after 6 h. and with itself at any time. Can be topcoated with all conventional 1K and 2K clearcoats.

After painting, turn the can upside down and spray the valve until empty.

## **Additional Information**

## **Important Information**

Do not apply to any safety-relevant plastic parts, e.g. helmets.

Do not apply to surfaces coated with synthetic resin paints as this could lift and cause ripples in the paintwork underneath.

#### 60 months

The usage period refers to an unused can that is stored correctly at a temperature of 60° F - 77°F / 15 - 25 °C and a relative humidity below 60%. The can must be stored and transported in an upright position in a dry place where it is protected against chemical and mechanical influences. The safety information on the can and all statutory provisions applicable for the storage site must be observed. The completely emptied spray cans must be disposed of in the recycling system. Cans with hardened material must be disposed of as special waste.

For professional use only. Identification, see safety data sheet.
